Hi Candace,

We don't have a VPAT that I can provide to you, but the most frequently asked accessibility-related question we receive pertains to closed captioning.

We don't yet provide a way to add closed captions to the videos you create with Educreations. However, there are third party services that make this possible. If you upgrade to one of our Pro plans, you will be able to export MP4 videos of your lessons, which you can upload to another service that provides closed captioning support.

YouTube offers a free captioning tool that allows you to do it yourself.

Or you can check out Amara, which is a non-profit offering a great free tool for captioning videos.
