

Accessibility Conformance, Compliance and Remediation Form

At Pearson, we support every learner.

Pearson's defining goal — to help people make progress in their lives through learning — can only be fulfilled when our educational materials are accessible to all users.

Our commitment

Accessibility and achievement go hand in hand. We are committed to enabling access for people with disabilities as part of the fabric of our learning materials, development processes, innovation efforts, and employee culture. Our goal is to ensure that all students can learn from our products and demonstrate that learning.

Our standards & progress

Pearson continues to make steady progress in developing our learning platforms, rich media assets, and other content to be as accessible as possible to all of our customers. WCAG 2.0 AA standards form the basis of the Pearson Accessibility Guidelines for product development, and we regularly review our existing platforms and content to improve accessibility with each release. We provide up-to-date, clear and straightforward statements on the accessibility of our products.

The Accessibility Conformance, Compliance and Remediation Form

This form lists the current accessibility gaps in Pearson titles you are considering or have adopted for your course. Issues listed have been confirmed during Pearson's standard accessibility testing process

Information presented in table below includes:

- **Status of gaps in accessibility for this title:**
 - Open: The issue is under investigation or in remediation
 - Closed: The issue was resolved with the latest product release in [mm/year].
 - Deferred: The issue will NOT be fixed in current edition.
- **Remediation Timeline:** Target date for resolution of issue.
- **Recommendations / Available Workarounds (if available)**
