Improved Labeling of Fields	Open	P	Q3 / Q4 2020		
Contrast Issues	Open	P	Q3 / Q4 2020		

Additional Information

The issues described above are not systemic throughout, but rather sporadic. We are currently initiating an in-house, full accessibility audit of the site starting in May and scheduled to be completed by August utilizing our accessibility partner, DeQue's tools and support. We are looking to identify and capture specific issues and problems that need to be fixed. As problems are identified we will be incorporating them into our development effort for remediation. Additionally, all new scheduled development has accessibility QA built into acceptance criteria for delivery.
