Summary Table Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems Accessibility	Supports	These databases support 9 of 10 applicable standards. See the table for Section 1194.21 below for more details.
Section 1194.22 Web Accessibility	Supports	These databases support 13 of 14 applicable standards. See the table for Section 1194.22 below for more details.
Section 1194.23 Telecommunications Products	Not Applicable	These databases are not a telecommunications product.
Section 1194.24 Video and Multi-media Products	Does not Support	These databases support 0 of 3 applicable standards. See the table for Section 1194.24 below for more details.
Section 1194.25 Self-Contained, Closed Products	Not Applicable	These databases are not a self-contained, closed product.
Section 1194.26 Desktop and Portable Computers	Not Applicable	These databases are not a desktop or portable computer.
Section 1194.31 Functional Performance Criteria	Supports	These databases support 4 of 5 applicable standards. See the table for Section 1194.31 below for more details.
Section 1194.41 (a) Information, Documentation and Support	Supports	These databases support 3 of 3 applicable standards. See the table for Section 1194.41 below for more details.

Section 1194.21 Software Applications and Operating Systems - Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports with Exceptions	All functions are supported except for accessing the "Curriculum Tools" type drop-down lists, tab on the main navigation bar.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Fully Supports	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Fully Supports	

(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Fully Supports	
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Fully Supports	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Fully Supports	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Does not Support	Operating system palate systems are ignored.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not Applicable	

(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Fully Supports	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supports with Exceptions	Supported throughout the product except on the pages where video content is displayed. Due to video playback functionality this can not be guaranteed on pages with video content.
(I) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Fully Supports	

Section 1194.22 Web-based Internet information and applications - Detail
Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non- text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Fully Supports	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Fully Supports	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Fully Supports	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Fully Supports	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Fully Supports	All links pertaining to video content are supported. Some additional advanced functions may not strictly adhere to this standard.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Does not Support	No client side image maps are supported.
(g) Row and column headers shall be identified for data tables.	Fully Supports	

(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Fully Supports	Simple data table formats are provided.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Fully Supports	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports with Exceptions	Supported throughout the product except on the pages where video content is displayed. Due to video playback functionality this can not be guaranteed on pages with video content.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not Applicable	
(I) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Fully Supports	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet	Fully Supports	

that complies with §1194.21(a) through (I).		
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Fully Supports	
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not Applicable	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	

Criteria	Supporting Features	Remarks and explanations
(a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	Not Applicable	The World Religions Online Database is not an analog television display. It is an online product and cannot be accessed through a tuner.
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio	Not Applicable	The World Religions Online Database is not an analog television display. It is an online product and cannot be
program playback circuitry.		accessed through a tuner.

Section 1194.24 Video and Multi-media Products – Detail Voluntary Product Accessibility Template

(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Does not Support	
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Does not Support	
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Does not Support	

Section 1194.31 Functional Performance Criteria - Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Does not Support	
(b) At least one mode of operation and information retrieval that does not require Eyball acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are Eyballly impaired shall be provided.	Fully Supports	Read Aloud feature available for all article text.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports with Exceptions	Videos within the World Religions Online Database are not yet closed captioned. Some archival video footage contains little or no dialogue.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Fully Supports	Video player supports volume control.

(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not Applicable	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supports with Exceptions	Fundamental functions, including navigation, search and video playback are supported. Some advanced features may not be fully supported.

Section 1194.41 Information, Documentation, and Support - Detail Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
(a) Product support documentation	Fully Supports	All support materials are available in
provided to end-users shall be made available in alternate formats upon request, at no additional charge.		an HTML format.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Fully Supports	This guide will be available in an HTML and PDF format, as a description of the products' accessibility and compatibility, in the available help center.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Fully Supports	The World Religions Online support team can be contacted for assistance via e-mail and phone. Other methods can be made available upon request.
