

Our Commitment to Accessibility

At Turnitin, we believe that learning technologies should not limit, but enhance learning for everyone. Our accessibility program aims to incorporate accessibility into the entire product development lifecycle to ensure that our website and applications are accessible and usable by everyone regardless of disability or circumstance.

Accessibility Standards Compliance

Turnitin partnered with Level Access, experts in user accessibility and compliance, to produce a set of Voluntary Product Accessibility Templates (VPATs), which can be viewed by clicking the links below.
