### Gale's Electronic Product Accessibility Policy

#### Gale is committed to making its products accessible to users of all abilities.

The majority of Gale online products for libraries are compatible with assistive technologies and meet key federal standards for compliance under Section 508 of the Rehabilitation Act, as well as most Level A (Priority 1) and AA (Priority 2) success criteria of the Web Content Accessibility Guidelines (WCAG 2.0) developed by the Worldwide Web Consortium (W3C).

Since Gale publishes and hosts content from a wide variety of reference sources and periodicals as well as digital archives of historical materials, it is not possible to ensure the complete compliance of every document. Nonetheless Gale is working to maximize accessibility of its content. Through the efforts of a dedicated User Experience team and the extension of accessibility testing to include both automated and manual testing, Gale strives continually to make its products universally accessible and user-friendly and to bring its user experience into full alignment with Section 508 standards and WCAG 2.0 Level A and AA success criteria.

#### For Further Information

If you are seeking information about the accessibility of Cengage Learning educational materials, please go to <http://www.cengage.com/accessibility/>

If you have general product questions about registration, accessing digital content, or access codes, please contact [Customer Service](#).

The date of this update was November 2013.

## Connecting Libraries to Learning

For more than 60 years, Gale, a Cengage company, has partnered with libraries around the world to empower the discovery of knowledge and insights by all people, for all purposes. Knowledge is power, and the act of learning is empowering. Access to knowledge offers learners an opportunity to discover the motivation and inspiration vital to making a positive contribution in not only their own lives, but the rest of the world. That's why Gale provides libraries with original and curated content, as well as the modern research tools that are crucial in connecting libraries to learning, and learners to libraries.
