To whom it may concern,

Mastercam's Experience Strategy is to differentiate our brand through world-class experiences for an international audience. As part of this overall strategy, we are committed to incorporating accessibility into our products and services.

We strive to create products and services that can be used by as many people around the world as possible. Examples of this within our products include:

- Providing video subtitles
- Adding documentation metadata to support screen readers
- Creating redundant interactions in the software to support a variety of input devices

For more detailed information, please visit this site: [Global Accessibility Awareness Day - mastercam.com](http://www.mastercam.com)

In addition, our Mastercam website includes the following accessibility statement:

"Mastercam is committed to providing an equal and quality experience for everyone. We're constantly working towards improving the accessibility of our website to ensure we provide equal access to individuals with disabilities including those with visual, hearing, cognitive, and motor impairments.

Wherever possible, we strive to conform to level A and AA of the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines (WCAG) 2.2. These guidelines provide a foundation for how to make web content more accessible for people with various disabilities. We believe not only in conformance with these guidelines but that optimization around them will help make the web more user-friendly for everyone."

For more details, please visit this site: [Accessibility Statement - mastercam.com](http://www.mastercam.com).

If you have any questions, please contact the Mastercam User Experience team (userexperience@mastercam.com).
